Open this URL on any phone or laptop to follow along with the demo.

What you'll learn

This guide walks you through demoing the MPPM Membership platform end-to-end — from public landing page, through Member sign-up, Merchant onboarding, voucher claim & redemption, all the way to admin oversight.

At a glance

RM10 lifetime membership · **10–35%** discount range · **RM300/month** merchant subscription · QR-code voucher redemption · manual bank-transfer payment with admin approval.

Document version · 30 April 2026

1. System overview

MPPM Membership is a single-platform discount network that connects **paying members** with **vetted merchants** across Malaysia. It is operated by Majlis Permerkasaan Perniagaan Malaysia (MPPM) and runs entirely on the web — no app installation needed.

Three roles

Member	Merchant	Admin
Pays RM10 once (lifetime). Browses offers, claims a voucher, shows the QR at the merchant counter to save 10–35%.	Pays RM300/month . Lists unlimited offers with a discount %, valid window, stock cap. Redeems QR vouchers at the counter.	MPPM staff. Approves merchant accounts, verifies bank transfer payments, monitors live activity and revenue.

Core value proposition

For members — pay once, save forever. RM10 unlocks lifetime access to verified discounts. No app, no subscription, no per-transaction fee.

For merchants — predictable monthly cost (RM300 flat). No commission cuts, no transaction fees. Reach thousands of paying members hunting for value.

For MPPM — transparent revenue model: lifetime member fees + recurring merchant subscriptions. Built-in audit trail of every payment, claim, and redemption.

2. Before you demo — pre-flight checklist

Run through this list 10 minutes before your demo to avoid surprises.

1 Server is running

Open `https://coreosai2.store/healthz` — expect `{"status": "ok"}`.

2 Demo data is fresh

Run `.venv/bin/python -m scripts.seed --demo` — this is idempotent (safe to re-run).

3 Login works for all 3 roles

Test admin / merchant / member logins (see credentials in section 3).

4 Mobile preview ready

Have a phone or browser DevTools mobile-view open in a second tab to show responsive design and bottom-nav.

5 Internet connection stable

Tailwind, fonts, and HTMX are loaded from CDNs.

6 Reset state if needed

To wipe demo state and start fresh, delete `data/mppm.db` and re-run the seed.

Pro tip

Tip: open three browsers (or three Incognito windows) before the demo, each logged in as a different role. Switching tabs is faster than logging out and back in.

3. Demo accounts

These accounts are created by `scripts.seed --demo`. All use the password `ChangeMe123!`.

Role	Email	Password	Use for
Admin	admin@mppm.local	ChangeMe123!	Approve payments, manage merchants
Member	member@demo.local	ChangeMe123!	Already paid; can claim vouchers
Merchant (FB)	fnb@demo.local	ChangeMe123!	Nasi Lemak Antarabangsa, PJ
Merchant	merchant@demo.local	ChangeMe123!	Kedai Demo Sdn Bhd, KL
Merchant	retail@demo.local	ChangeMe123!	Bandar Boutique, KL
Merchant	beauty@demo.local	ChangeMe123!	Glow Beauty Studio, Subang
Merchant	pharmacy@demo.local	ChangeMe123!	FarmaSihat, Shah Alam
Merchant	auto@demo.local	ChangeMe123!	AutoCare Workshop, Klang
Merchant	fitness@demo.local	ChangeMe123!	PowerHouse Fitness, Cheras
Merchant	education@demo.local	ChangeMe123!	BrightMind Tuition, JB
Merchant	homeservices@demo.local	ChangeMe123!	CleanPro, PJ
Merchant	travel@demo.local	ChangeMe123!	Pulau Hijau Resort, Langkawi
Merchant	electronics@demo.local	ChangeMe123!	GadgetHub, Mid Valley

Security note

Change **all** passwords and the admin email before going live. The seed-script credentials are intentionally weak for demo only.

4. Demo Flow A — The Member journey

Show how a regular Malaysian becomes a paying member and starts saving.

Steps

1 Visit the public landing

Open <https://coreosai2.store/>. Walk through the value-prop sections: *Why join as Member* and *Why list your business*. Highlight the **RM10 lifetime** hero badge.

2 Browse offers without an account

Click *Browse*. Show variety: 11 merchants across F&B, retail, beauty, health, automotive, fitness, education, home services, travel and electronics.

3 Sign up as a new member

Click *Join as Member*. Fill the form — emphasise the simple fields (name, email, IC, address, password). Submit.

4 See the bank-transfer instructions

After signup the user lands on <https://coreosai2.store/member/payment> — show the bank account details and the unique reference number (member number).

5 Submit transfer proof

Fill in transfer reference, bank, paid-on date. Submit. Status now reads **pending**.

6 Switch to the existing demo member

Log out and log back in as `member@demo.local` who is already approved. Show the active membership card with member-number badge.

7 Claim a voucher

From the home, scroll to featured offers — pick any offer, click *Claim my voucher*. The user is taken to the QR voucher screen.

8 Show the wallet

Click the *Wallet* tab in the bottom-nav (mobile) or top-nav (desktop). Show all claimed vouchers grouped by status.

9 Demo mobile responsiveness

Open DevTools, toggle to phone preview. Show the sticky bottom-nav and how everything reflows.

10 Profile management

Show the profile screen — member can update name, phone, IC, address.

5. Demo Flow B — The Merchant journey

Show how a Malaysian SME signs up, gets approved, lists offers, and redeems vouchers.

1 Sign up as a new merchant

From the landing, click *Become a Merchant*. Walk through the longer form — business name, SSM, category, location, description, website.

2 First-month payment instructions

After signup the merchant lands on <https://coreosai2.store/merchant/payment>. Show the RM300 bank transfer details and the merchant reference.

3 Submit transfer proof

Submit the transfer ref. Merchant is now **pending admin approval**.

4 Switch to an approved merchant

Log out and log in as e.g. `fnb@demo.local`. Show the live dashboard with subscription expiry, listings count, vouchers in the wild, redemption count.

5 Add a new listing

Click + *New listing*. Show the form — title, price, discount % (10–35), valid window, stock, T&Cs. Publish.

6 Edit and pause a listing

Open an existing listing. Show the inactive checkbox. Save. Demonstrate that paused listings disappear from the public browse page.

7 Redeem a voucher

From the bottom-nav, tap *Redeem*. Type or paste a voucher code (use the one you just claimed as a member in flow A). Show the green success card with member name + discount applied.

8 Try to redeem the same voucher again

Show the red error: *'Voucher already redeemed on...'*. Demonstrate single-use enforcement.

9 Renewal payment

Show the *Payment* screen — merchants submit a fresh transfer to extend subscription by 30 days.

6. Demo Flow C — The Admin journey

Show oversight: approve merchants, verify payments, view revenue.

1 Open the admin dashboard

Log in as `admin@mppm.local`. Show the headline cards: total members, paid members, active merchants, pending merchants, revenue.

2 Review pending payments

Click *Payments to review*. Show the new member's transfer details, including the reference number they entered.

3 Approve the payment

Type a note (optional) and click *Approve*. The member's account flips to active. Switch back to that member's tab and refresh — see the active card.

4 Approve a merchant

Open *Merchants » Pending*. Approve the new merchant. Their subscription is now active for 30 days from their first payment date.

5 Reject a payment

Demonstrate the reject flow: Reason field is required so the user knows why.

6 Suspend a merchant

Demonstrate suspending an approved merchant — their listings disappear from public browse instantly.

7 Filter and search

Show filtering members by paid/unpaid, merchants by status, payments by kind.

7. End-to-end live demo (15-minute script)

Use this if you have only 15 minutes with a customer or partner. It hits the highest-impact moments without dragging.

Time	What you do	What you say
0:00	Open landing /	<i>'This is the public face — value prop for members and merchants.'</i>
1:30	/listings — show variety	<i>'11 merchants in 10 industries already on board.'</i>
3:00	Log in as member	<i>'Members pay RM10 once. Lifetime.'</i>
4:00	Claim a voucher → QR	<i>'One tap. The QR lives on the phone.'</i>
5:30	Switch tab to merchant	<i>'This is what the merchant sees on day one.'</i>
7:00	Add a new listing	<i>'10–35% range is enforced. Stock and dates too.'</i>
9:00	Redeem the voucher	<i>'Type or scan. Single-use, audit-logged.'</i>
10:30	Switch tab to admin	<i>'Every payment is reviewed before money moves.'</i>
12:00	Approve a payment	<i>'One click flips the user to active.'</i>
13:30	Show mobile preview	<i>'Designed mobile-first. Sticky bottom-nav.'</i>
14:30	Q&A;	—

8. Talking points by screen

Quick one-liners you can drop while clicking through the demo.

Landing page (<https://coreosai2.store/>)

- Hero: 'One RM10 lifetime card. Endless 10–35% discounts.'
- Three live counters at the top: merchants, listings, discount range.
- Two clear CTAs: *Join as Member* (gold) and *Become a Merchant* (purple/blue).
- Three reasons-to-join cards for each side.
- How-it-works: 3 numbered steps (sign up → claim → show).
- Featured offers carousel pulls from real DB.

Public browse (<https://coreosai2.store/listings>)

- Search box + category filter both work without login.
- Each card shows merchant, location, discount %, original & discounted price.
- Click any card → full detail page with terms, validity, stock.

Member home (<https://coreosai2.store/member>)

- Big membership card with status pill (Active · Lifetime).
- Active vouchers section.
- Featured offers carousel.
- Sticky bottom-nav on mobile: Home / Browse / Wallet / Me.

Voucher screen (<https://coreosai2.store/member/voucher/X>)

- Large QR code (server-rendered as PNG, no third-party).
- 10-character code below the QR for typed entry.
- Listing details, discount, validity, redeem location.
- External merchant URL link if applicable.

Merchant home (<https://coreosai2.store/merchant>)

- Subscription expiry pill, with renew button if expired.
- Four KPIs: active listings, vouchers in the wild, redeemed, redeem-now CTA.
- Recent claim/redemption activity table.

Merchant redeem (<https://coreosai2.store/merchant/redeem>)

- Centered form, large monospace input.
- Success card shows customer name, offer, code, timestamp.
- Failed redemption shows clear error reason.

Admin dashboard (<https://coreosai2.store/admin>)

- Eight headline cards: members, merchants, listings, vouchers, payments, revenue.
- Pending payments + pending merchants both surfaced on the home.
- Click any number → drill into that filtered view.

9. Common questions & answers

Q. Is the RM10 fee really lifetime?

Yes. One-time, non-recurring. The member's record carries an `is_paid=True` flag forever once approved.

Q. What happens if a merchant stops paying?

Their `subscription_expires_at` date passes — their listings stop appearing publicly, but historical data remains. They simply renew via <https://coreosai2.store/merchant/payment> to come back online.

Q. Why manual bank transfer instead of FPX or e-wallet?

Phase 1 ships without payment-gateway onboarding. Phase 2 swaps in Billplz or ToyyibPay (FPX + e-wallets) without changing the rest of the system.

Q. How do you prevent voucher fraud?

Every voucher has a unique 10-character code, single-use status. The merchant verifies the code on the spot. The system rejects re-use, expired vouchers, and vouchers from other merchants.

Q. Can a member claim multiple vouchers from the same offer?

No. While a previous voucher for the same listing is still active, the system returns the existing one rather than creating duplicates.

Q. How is data protected?

Passwords are bcrypt-hashed. Sessions are signed cookies (`itsdangerous`). Admin-only routes verify role on every request. SQL queries use parameterised ORM — no string concatenation.

Q. Can the discount range change?

10–35% is enforced server-side. Easy to adjust by changing the validation in `app/routes/merchant.py::_validate_listing`.

Q. Is it mobile-only or desktop too?

Both. Tailwind responsive design. Sticky bottom-nav appears on mobile (md breakpoint), horizontal nav on desktop. Tested at 320px width and up.

Q. Where is data stored?

SQLite at `data/mppm.db` for the prototype. Migration to PostgreSQL is straightforward via the `DATABASE_URL` environment variable.

Q. Is there an API?

Internal only at present (FastAPI auto-generates OpenAPI docs at <https://coreosai2.store/docs>). External API for partner integrations is a Phase 2 candidate.

10. Technical appendix

For partners or buyers who want to know what's under the hood.

Stack

Backend	FastAPI (Python 3.12+) on Uvicorn
ORM / DB	SQLAlchemy 2.x · SQLite (dev) → PostgreSQL (prod)
Frontend	Server-rendered Jinja2 + Tailwind CDN + HTMX 2.x
Auth	Bcrypt password hashing, signed-cookie sessions (itsdangerous)
QR codes	Server-side via the <code>qrcode</code> Python library, returned as base64 PNG
Mobile-first	Tailwind responsive utilities · viewport-fit=cover · 44px tap targets
Hosting	Single-server systemd unit behind nginx + Let's Encrypt TLS

Key URLs

Health	https://coreosai2.store/healthz
This PDF	https://coreosai2.store/docs/demo-guide.pdf

Database tables

users	Email, password hash, name, phone, role enum
member_profiles	Member number, IC, address, is_paid flag
merchant_profiles	Business info, is_approved, subscription_expires_at

payments	Kind (member_join/merchant_monthly), amount, transfer ref, status, period
listings	Title, category, price, discount %, validity window, stock
vouchers	Unique code, listing_id, member_id, status (active/redeemed/expired/cancelled)

Security highlights

- All routes guarded by role-based dependencies (`require_member` / `require_merchant` / `require_admin`).
- Bcrypt for password hashing — not reversible.
- Single-use voucher codes; double-redemption is rejected with audit log.
- Manual payment review prevents accidental activation.
- All forms use POST with CSRF-equivalent session check (server-side session id).

Powered by Majlis Pemerkasaan Perniagaan Malaysia

An initiative to empower Malaysian SMEs through a transparent, low-cost, discount-driven membership network.

Admin portal

Internal admin tools — approve, monitor, audit.

Admin overview — revenue, member/merchant counts, pending items

<https://coreosai2.store/admin>

The screenshot shows the 'Admin overview' dashboard. At the top, there is a navigation bar with 'Admin', 'Merchants', 'Members', 'Payments', 'Admin', 'admin', and 'Logout'. A status message indicates 'Demo mode — payment gateway not connected; signups are auto-approved so you can click through the full flow.' The dashboard features several summary cards: '2/3 Members paid', '11/11 Active merchants', '0 Pending merchants', '1 Payments to review', '26 Active listings', '1 Vouchers active', '1 Vouchers redeemed', and 'RM 3320 Approved revenue'. Below these are sections for 'Pending payments' (listing 'tong chuan tung' with 'RM 10' to review) and 'Pending merchants' (showing 'No pending merchants.'). The footer contains copyright information for 2026 MPPM Membership and is powered by Majlis Pemerkasaan Perniagaan Malaysia.

Admin members list, filter paid/unpaid

<https://coreosai2.store/admin/members>

The screenshot shows the 'Members' list page. It has a navigation bar similar to the overview page. A status message is present. Filter buttons for 'All', 'Paid', and 'Unpaid' are shown. A table lists members with columns for MEMBER, EMAIL, MEMBER NO., STATUS, and JOINED. The table contains three entries: 'tong chuan tung' (unpaid), 'Test User' (paid), and 'Demo Member' (paid). The footer includes copyright information for 2026 MPPM Membership and is powered by Majlis Pemerkasaan Perniagaan Malaysia.

MEMBER	EMAIL	MEMBER NO.	STATUS	JOINED
tong chuan tung	tiongct45@hotmail.com	M2026-325513	unpaid	30 Apr 2026

Admin payments review — approve/reject with note

https://coreosai2.store/admin/payments

The screenshot displays the 'Payments' section of the MPPM Membership admin interface. At the top, there are navigation tabs for 'Admin', 'Merchants', 'Members', 'Payments', and 'Logout'. A status bar indicates 'Demo mode — payment gateway not connected; signups are auto-approved so you can click through the full flow.' Below this, the 'Payments' section has filters for 'All status' (Pending, Approved, Rejected) and 'All kinds' (Member join, Merchant monthly). The main content is a list of payment transactions, each with a card showing the merchant/member name, amount, status, and submission date. The first transaction, 'tong chuan tung', is highlighted in blue and shows a 'pending' status with 'Approve' and 'Reject' buttons. Other transactions are marked as 'approved'.

Name	Amount	Status	Submitted
tong chuan tung	RM 10.00	pending	30 Apr 2026 15:09
Ahmad bin Razak	RM 300.00	approved	30 Apr 2026 15:06
